Penn Medicine Princeton Health Update on COVID-19

COVID-19 causes fever and symptoms of a respiratory infection — cough, shortness of breath and difficulty breathing.

If you have these symptoms AND have traveled to China, Iran, Italy, Japan, South Korea, have been in contact with someone who has been there and/or in contact with someone who has a confirmed case of COVID-19, call your primary care physician. To protect yourself and others, you should wear a mask to help prevent the spread of this virus until you have been treated by your doctor. If you feel seriously ill, visit the Emergency Department (ED), but wear a mask and contact the ED ahead of your visit via phone at 609.853.7100 to let them know of your symptoms and exposure.

For additional information, please visit the CDC website at: https://www.cdc.gov/coronavirus/2019-ncov/index.html.
