

Quality Council

Purpose

The purpose of the Quality Council is to identify, review and analyze data to measure and monitor nurse-sensitive patient outcomes, and recommend further action as a result of the data analysis. Coordinates and disseminates nursing quality information throughout the organization.

Goals

The goal of the Nursing Quality Council is to:

- Assess and review data sources, and establish department priorities
- Develop and monitor action plans for improvement
- Monitor outcomes of nursing practice (i.e. Falls)
- Communicate findings throughout the nursing department and other involved departments, through the hospital performance improvement committee
- Monitor compliance with Joint Commission standards and other governing bodies and make recommendations on initiatives for improvements
- Focus on Medication Process and Improvement

Second Thursday 1pm-2pm
