

Research Council

Purpose

The purpose of the Research Council is to educate and mentor nurses and nursing students in their understanding of clinical research and evidence-based practice. Assists to facilitate the integration of research in the clinical setting, translate evidence based practice into clinical practice and facilitate conducting nursing research.

Goal

The goal of the Nursing Research Council is the dissemination of information; to advance knowledge related to the research process, to support a culture of research, and finally to affect care at the bedside. The dissemination of knowledge will educate nurses regarding the research process, promote ongoing endeavors, communicate findings, and ultimately transform care at the bedside to improve patient outcomes.

- Dissemination of knowledge related to research
- Supporting a culture of research and ongoing endeavors
- Dissemination of research findings
- Transforming care at the bedside

Second Thursday 9am-10am
